

“Sign In Successful” Message

- Lets change the smiley face to Adifect logo and the maybe change the color from green to the Adifect colors.
- If the user gets an unsuccessful message - they should still see the adifect logo but in red.

Marketing Agency Account

Job Submissions page: The job submission page is different under the “admin” account than it is under an “agency” account.

Admin account form:

Please select atleast one image

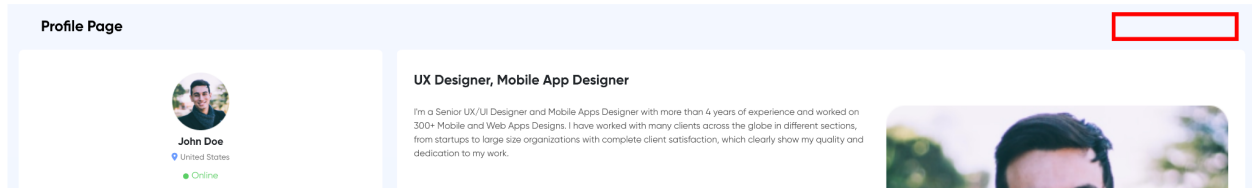

Analytics Page:

- Let's add all of the “dummy” data, from the homepage/dashboard to the “analytics page” for now. Maybe even add a few random graphs of data just show to the different performance measures/metrics we will provide.

Profile Page:

- Need the option to “Edit Profile”

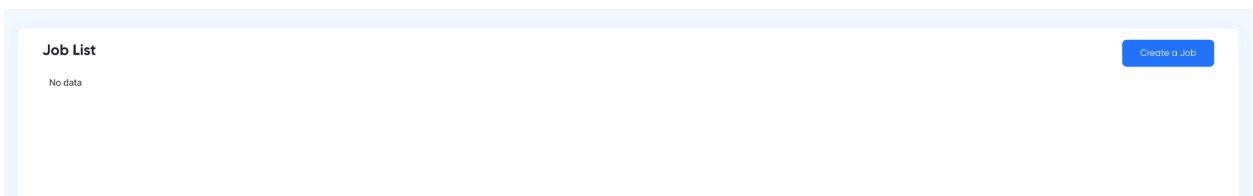

- Need to add “Preferred Method of Communication”
 - Whatever they choose, they will need to provide the connection for it - email, text, slack, ms teams, etc...

Content Creator Account

Jobs Tab:

- Should we allow for “Content Creator to “create job”? I would think no?

Admin Account

Job List:

- The “view” icon is linking to a blank page. Ideally this would pop out the “job card” and show the full job details.
