

July 20 2022

- Overall:
 - I think there are no scroll bars that are appearing when the page is long.
 - Remove the search from the header bar.
 - I think there are a number of things on all pages that does not match the figma style guide or the design concept. I am not sure if there are good reasons we are waiting on that or deviating but would like to make sure that we do all of the polish on the components now so that we can use them all going forward in their correct ways.
- Creator Account:
 - The creator nav will be:
 - Projects
 - Earnings
 - Analytics
 - Transactions
 - Jobs
 - Settings
 - Help
 - Dashboard:
 - The header at the top that is supposed to invite them to apply for open jobs is missing.

Fresh Job [See More](#)

- - Jobs View:
 - When you click a job you are not able to go into the detailed view of that job.
 - Some of the ui Jira items are still outstanding, like the tag buttons.
 - We would like to add a filter and search at the top of this page. It should allow you to filter based on budget, skills, and tags. There should be design concepts in the figma that we can use for this.
- Agency Account:
 - The agency nav will be:
 - Projects
 - Analytics

- Transactions
- Jobs
- Settings
- Help
- Detailed Job view:
 - Some of the jira tickets are outstanding still. We need to match those updates like the tag pills and the attachment images etc. showing when they are present.

Marketing campaign job for adifect

Due on: 01-01-2022

Tags

- Skills and tags should operate the same way but just have different data in them.
- It looks like the dropdown styles, date picker style are not matching the figma

- Dashboard:
 - This should show the pending jobs that I have. Currently there is a pending job that doesn't show on the dashboard.
